

Peacemaker® H₂S Converting Dry Air Scrubber

Converting Media Technology: Unlike activated Carbon that absorbs H₂S, our Patented Converting Media Technology reacts with H₂S to form a water soluble and non-volatile poly sulfide that is readily bio-degradable. In simple terms, gaseous H₂S is turned in to a stable liquid polymer.

- Peace of mind for you and your surrounding communities.
- 99-100% Average & Peak Hydrogen Sulfide (H₂S) Loading Removal.
- Syneco Systems WWTP Decentralized / Point Source Odor Control Process:
 - * Designed & Sized for each WWTP Application
 - * No added ducting costs
 - * No Maintenance
 - * Cost effective!
- Return on investment / Cost Savings:
 - * Corrosion control – Saves on Re-Lining Costs and Instrumentation Costs
 - * No Maintenance
 - * No added chemical, biological or water addition
 - * Much lower construction, electrical, mechanical and installation costs
- Working together: Syneco Systems will work with you to design and implement THE BEST overall odor control solution for your specific application.
