

## PEACEMAKER® INFLOW PROTECTOR MANHOLE INSERTS SIZING

Measure each and every manhole for which you are ordering inserts, unless you are absolutely sure of dimensions. Your order will be custom made to your supplied dimensions. Errors in instructions received from you may result in unusable inserts for you because they are non-returnable. –If you have any questions concerning the insert dimensions please call: 952.927.9215.

The drawings below illustrate the required measurements:

The Style of insert (IP-1 or IP-2) is determined by the cover configuration. Style IP-1 inserts are for manhole covers with an essentially flat underside. Style IP-2 inserts are designed for deeper covers – so the C and D Dimensions must be provided.

- A. Manhole Frame Diameter (flat bearing surface)
  - B. Inside Frame Diameter (clear opening)
  - C. Drop Ring Diameter
  - D. Drop Ring Depth (from cover underside, outside edge)
- A. Manhole Frame Diameter (flat bearing surface)
