

PEACEMAKER® MIST/GREASE CONTROLLER

Our technology is designed to control excessive levels of mist and grease that adversely affect the performance of media in dry air scrubbers. High levels of mist and grease blind the media disallowing the media to absorb the malodors that the scrubbers are designed to eliminate. Carbon media is most affected.

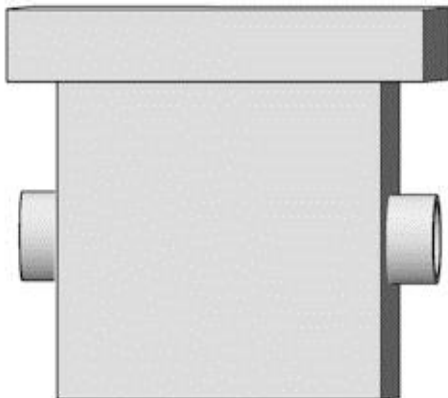

SPECIFICATIONS AND PHYSICAL DATA

Mist/Grease Controller vessels and covers are constructed from 3/16" white HDPE. All models are available in both in-line and 90 degree elbow styles. Larger custom models are available; please call Syneco Systems for a quote. The interior mat can be cleaned and re-used as needed.
