

CASE HISTORY: A BREWERY PUMP STATION IN INDIANA

Problem:

A brewery pump station, located next to tasting patio, had several complaints and odor related issues. This customer called in early August 2017 and said that the University of Indiana move in day was fast approaching, and they needed odor control ASAP.

Solution:

Based on the loadings below, Syneco Systems recommended our Peacemaker® 3'x3' Dry Air Scrubber system, and delivered the system by August 31st, 2017. With our patented Persnickety® Converting and Polishing media, our Peacemaker® system has fully removed H₂S and other malodors for over a year.

Result:

Our Peacemaker® 3'x3' system has effectively eliminated odors and complaints have stopped.

H₂S Influent: Average= 54 PPM Peak= 396 PPM

H₂S Effluent: Average= 0 PPM Peak= 0 PPM
