

Peacemaker® H₂S Converting Dry Air Scrubbers

Converting Media Technology: Unlike activated carbon that absorbs H₂S, our patented converting media technology reacts with H₂S to form a water soluble and non-volatile poly sulfide that is readily bio-degradable. In simple terms, gaseous H₂S is turned into a stable liquid polymer.

No Job is too Big or too Small!

- Peace of mind for you and your surrounding communities.
- 99%+ Average & Peak Hydrogen Sulfide (H₂S) Loading Removal.
- Syneco Systems WWTP Decentralized/ Point Source Odor Control Process:
 - * Designed & Sized for each WWTP Application
 - * No added Ducting Costs
 - * No Maintenance
 - * Cost Effective!
- Return on investment/ Cost Savings:
 - * Corrosion Control - Saves on Re-Lining Costs and Instrumentation Costs
 - * No added Chemical, Biological or Water Addition
 - * Much lower Construction, Electrical, Mechanical and Installation Costs
- Working together: Syneco Systems will work with you to design and implement THE BEST overall odor control solution for your specific application.
