

PEACEMAKER® ODOR CONTROL MANHOLE SCRUBBER ORDER FORM

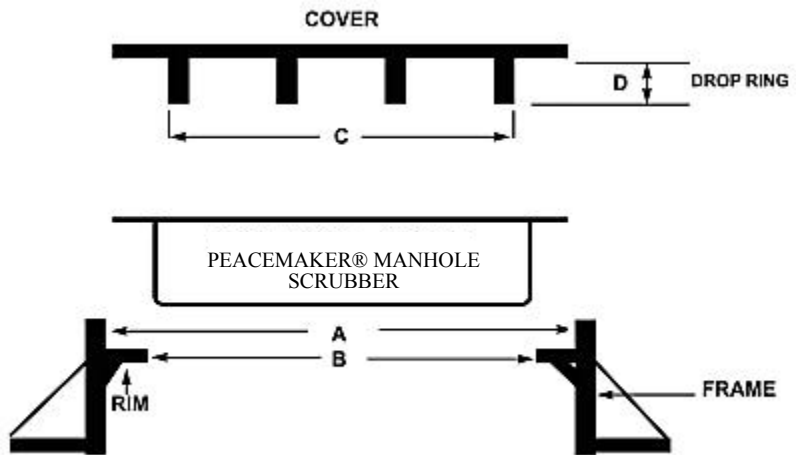

Technology designed for the control of hydrogen sulfide, mercaptans and other malodorous compounds found in sewer gases.

IMPORTANT

Measure each and every manhole for which you are ordering Peacemaker® Manhole Scrubbers, unless you are absolutely sure of dimensions. Your order will be produced to your supplied dimensions. Errors in instructions received from you may result in unusable product for you. The drawing below illustrates the required measurements.

REQUIRED MEASUREMENTS

- A- Manhole frame diameter (flat bearing surface)
- B- Inside frame diameter (clear opening)
- C- Drop ring diameter
- D- Drop ring depth (from cover underside, outside edge)

Order Information (Required Measurements)
