

The logo for SYNECO SYSTEMS INCORPORATED features a green square with a white sun and wavy lines representing water. To the right, the company name is written in a bold, blue, sans-serif font. Below the name, the tagline "Odor Control Made Easy!" is written in a smaller, italicized, blue font.

Syneco Systems, Inc. founded in 1983 is the manufacturer of odor and corrosion control equipment. Our product line includes our PEACEMAKER® dry air scrubbers and odor control manhole scrubbers, used with our industry leading patented PEACEMAKER® brand media. You can find our products predominately at municipal and industrial wastewater collection system pump stations, in manholes and at wastewater treatment plants.

PEACEMAKER® Dry Air Scrubbers can be used as a single vessel, two vessels in series, or two vessels in parallel. The scrubbers provide two stages of media for the control of hydrogen sulfide (H₂S), and other odors generated in wastewater collection systems, manholes and lift stations along with controlling various point source odors present in wastewater treatment plants. Our scrubbers are maintenance free, effective, economic and require no water addition.

PEACEMAKER® Media Converting/Polishing media is impregnated with a patented polymeric amine and is used in high H₂S conditions.

Disposal is not an issue when the media is changed out as recommended by the manufacturer.

PEACEMAKER® Odor Control Manhole Scrubbers provide control of H₂S and other odors while allowing generous venting through PEACEMAKER® H₂S Converting media. Our custom-made ABS plastic manhole scrubber inserts are effective, economic, easily installed by one person and require no maintenance.

PEACEMAKER® "WHAT'S THAT AWFUL SMELL?" Nearly all vent stacks suffer with odor problems, whether they are on homes, commercial buildings, small lift stations or EQ tanks. The main culprit is hydrogen sulfide (H₂S), but other malodorous compounds are present, as well. The problem has largely been ignored or ineffectively treated with activated carbon. PEACEMAKER® Vent Scrubbers use the same technology found in PEACEMAKER® Dry Air Scrubbers and in PEACEMAKER® Odor Control Manhole Scrubbers. Proven, practical technology which destroys odors — and lasts. Available in Slip Fit and Flange Fit Connections.
