Syneco Systems, Inc. founded in 1983 is the manufacturer of odor and corrosion control equipment. Our product line includes our PEACEMAKER® dry air scrubbers, odor control manhole scrubbers and vent scrubbers, used with our industry leading patented PEACEMAKER® brand converting media. You can find our products predominately at municipal and industrial wastewater collection system pump stations, in manholes and at wastewater treatment plants.

PEACEMAKER® Product Line

PEACEMAKER®
Dry Air Scrubbers

Dry Air Scrubbers can be used as a single vessel, two vessels in series, or two vessels in parallel. The scrubbers provide two stages of media for the control of hydrogen sulfide (H_2S) and other odors generated in wastewater collection systems, manholes, and lift stations, as well as various point source odors present in wastewater treatment plants. Our scrubbers are maintenance free, effective, economic and require no water addition.

ODOR HAMMER™
Converting/Polishing media

Converting/Polishing media is impregnated with a patented polymeric amine and is used in high H_2S conditions. Disposal is not an issue when the media is changed out as recommended by the manufacturer.

ODOR HAMMER™
HAMMER OUT H_2S ODORS

PEACEMAKER®
Odor Control Manhole Scrubbers

Odor Control Manhole Scrubbers provide control of H_2S and other odors while allowing generous venting through PEACEMAKER® H_2S Converting media. Our custom-made ABS plastic manhole scrubber inserts are effective, economic, easily installed by one person and require no maintenance.

PEACEMAKER®
Vent Scrubbers

"WHAT'S THAT AWFUL SMELL?" Nearly all vent stacks suffer with odor problems, whether they are on homes, commercial buildings, small lift stations or EQ tanks. The main culprit is hydrogen sulfide (H_2S), but other malodorous compounds are present, as well. The problem has largely been ignored or ineffectively treated with activated carbon. PEACEMAKER® Vent Scrubbers use the same technology found in PEACEMAKER® Dry Air Scrubbers and in PEACEMAKER® Odor Control Manhole Scrubbers. Proven, practical technology which destroys odors - and lasts. Available in Slip Fit and Flange Fit Connections.
